

VMware Market Maker Award

About the Award

Each fall, VMware takes a moment to recognize the company's "Market Makers" from around the globe, presenting them with an award for their hard work and commitment to enabling their customers to realize the many benefits of virtualization. This award recognizes a partner's performance over the past year, specifically honoring the region's top partner who has shown the highest revenue growth percentage over a 12-month period.

At VMworld 2007, ProSys was named VMware's 2007 Market Maker for the US. Our highly trained technical staff, strong sales force and exceptional customer service no doubt contributed immensely to the win. During the designated months, ProSys posted a 200% growth in VMware revenue.

The ProSys-VMware Partnership

ProSys is a VMware VIP Enterprise Premiere partner and a VAC accredited VMware consulting partner. As one of the top VMware resellers in the US, ProSys employs multiple VMware-certified professionals throughout our offices in the southeastern United States. To date, ProSys has successfully implemented VMware solutions for large enterprise and mid-market, government and educational institutions and more. VMware solutions from ProSys consolidate storage and servers in an efficient, manageable and agile infrastructure. Based on VMware technology,

ProSys designs and delivers high availability and disaster recovery solutions.
